

Laxmidhar Routa

Bangalore | 7205663354 | laxmidhar530@outlook.com

Highly motivated and skilled **Data Analyst** with **2.7 years** of experience in developing **AI/Gen AI** solutions for the business and **2.8 years** of expertise in **Business Operations**. Adept at developing Python-based applications, leveraging AI techniques to drive innovation and optimize processes. Seeking new challenges and opportunities as an **AI/ML developer** to contribute to organizational success.

WORK EXPERIENCE

Process Specialist, Infosys Ltd.

Nov 2021 - Present

- **LunchPad:** Implemented an LLM-powered solution for extracting and verifying candidate details, reducing manual effort, and enhancing business productivity.
- **Doc QA:** Developed a document QA system using Retrieval Augmented Generation (RAG) and LangChain and Llama-index frameworks improving response times and reducing manual effort.
- **Document AI:** Utilized transformers-based multi-modal models, achieving 98% accuracy in document classification and 95% accuracy in key-value pair extraction, with additional language translation capabilities.
- **Automated Ticket Classification:** Implemented a transformer-based model to classify employee queries and automate response emails, significantly reducing the 80% time spent on manual replies.
- **Time series forecasting:** Employed ARIMA, SARIMAX, RNN, LSTM, and GRU techniques to accurately forecast future values, improving decision-making and strategic planning through reliable trend predictions.
- **Generic OCR:** Leveraged Google Tesseract and Python libraries to extract text from images and documents efficiently.
- **SOW OCR Solution:** Executed a Python program to extract text between headings within 10 seconds, addressing difficulties in manual section extraction from extensive documents.
- **Resume Parser:** Data collection, data labeling and data cleaning.
